**Eorimok Course, Hallasan in Winter**

Hallasan might be part of Jeju, but it has a completely different climate. Even when Jeju or Seogwipo are bright and sunny, rain can suddenly start to fall at Hallasan or become immersed in fog. In order to reach Hallasan covered itself in ice and snow, the Eorimok Course is the easier path to take to enjoy Hallasan Mountain the winter.

---

**Camellia Hill, Camellia Flowers Shine in the Winter**

Jeju is home to various flowers and plants, but the camellia flower truly shines in the winter. Walk along the path covered in camellia petals and experience the romance of winter in Jeju. The moment will be even more romantic with someone you love.
Whatever you do and see in Jeju is a guaranteed success. But is there anything you might have missed? It's impossible to see everything in one trip. Still, here is a list of things you simply can’t miss while you're in Jeju. Get the most of your trip by going through all of Jeju’s highlights.
1. Yeongsil Hiking Trail (5.8 km, 2 hours 30 minutes)

The Yeongsil Trail is relatively easy as it is the shortest course toward Baeknokdam of Hallasan. It is open only up to Witse Oreum and does not allow hikers to reach Baengnokdam. Because of its relative ease, it is suitable for elderly climbers and newlywed couples.

2. Eorimok Hiking Trail (6.8 km, 3 hours)

This course is slightly steep but still relatively easy. Especially in the winter, snow spreads across Mansae Hill, so you can enjoy the beautiful winter scenery. Climbers are allowed only up to Witse Oreum.

3. Seongpanak Hiking Trail (8.6 km, 4 hours 30 minutes)

You will get a sense of being in a forest, but it may be difficult due to the long distance and steep slopes. This course is recommended for those who are intent on conquering Hallasan.

4. Gwaneumsa Hiking Trail (8.7 km, 5 hours)

The Gwaneumsa Trail is noted as the most demanding course in Hallasan due to its dramatically shifting topography within a 9km course. Because it requires about 30 percent more physical strength than the other hiking trails, more professional climbers choose this trail.

5. Donnaeko Hiking Trail (7 km, 3 hours 30 minutes)

The Donnaeko Hiking Trail is a gentle course that boasts lush forests that resemble a rainforest. You can rest at the Donnaeko Valley camping site.

* You can only reach the peak of Hallasan through the Seongpanak and Gwaneumsa Course via Baeknokdam. (The other courses only go up to Witse Oreum Shelter.)

* You need a reservation to climb the Seongpanak Course and Gwaneumsa Course. However, the reservation system has been temporary suspended from February 13, 2020 due to COVID-19 and you no longer need a reservation. (System to be resumed in the future.)

* Please check the weather before you begin your hike and check if the trail is open in the event of bad weather. http://www.jeju.go.kr/hallasan/index.htm

**Tip:** Anyone can try scuba diving regardless of their swimming skills.

**Submarines** A trip to an underwater world

To travel the large meadows of Jeju freely, horse-riding is highly recommended. Feeling the wind while on horseback gives you another taste of Jeju.

**Tip:** Be careful not to stand behind the horse to avoid getting kicked.

In addition to the above, there are also high-speed jet boats, relaxing yachts, parasailing, ATV’s and go-karts that ride across Jeju’s green terrain. You can also enjoy hunting for four months from part of November 1 through February.
